

Nature Card

Signs of Spring

STEPS:

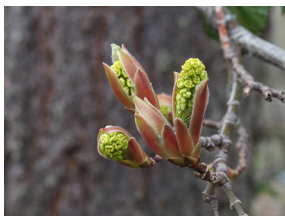

From your porch, in your backyard, around your neighborhood or driving in the car watch for signs of spring.

1. Look at tree and shrub branches for new emerging buds.
2. Watch for colorful wildflowers on the hillsides and in the fields.
3. Note birds carrying materials back to their nests in their beaks or talons.
4. Watch for exclusion areas on beaches set aside to protect nesting habitat for species like Snowy Plovers.

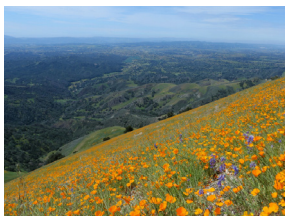

Pick your own “Site Spot” and watch as the seasons change. Find out more @ naturetrack.org ~ field trips ~ virtual trips ~ midland trails ~ Why and How You Should Start a Sit Spot Routine

Look for these signs of springs from your porch, in your backyard, neighborhood or local park.

Trees budding

Wildflowers blooming

Birds gathering nesting materials

Snowy Plover nesting
