

Nature Card

Colors of Nature

STEPS

1. Choose a color “chip” from the Ziplock.
2. Go outside and find something natural in nature, (i.e. a leaf, a rock, etc.) that is an exact match to your color chip.
3. Now describe what you found in your journal either with a picture or words.
4. Describe what you see, what it reminds you of, what it could be if you do not already know.
5. Repeat until you have matched all six colors to something in nature.
6. HAVE FUN!
