

# Nature Card

## *Leaf Comparisons*

### STEPS:

1. Find two different leaves.
2. Compare their shape, size, color, texture from front to back.
3. Where did the leaves come from? A tree, a bush, a garden plant?
4. Make a rubbing of each. What similarities or differences do you notice?
5. Raise each leaf an arm's length above your head and then drop them. How does each one fall? How fast or slow do they fall?
