

# Creature Card #10

**Great Blue Heron**

Check out other cool Creature Cards @ [naturetrack.org](https://naturetrack.org)

- Great Blue Herons stand 3-4.5 feet tall, with a wingspan of 5.5-6.5 feet and weight only 4-8 lbs.
- They fly with their neck tucked against their body in a “S” shape. Not to be confused with cranes who fly with their necks outstretched.

*Jocelyn Anderson*

- Great Blue Herons will eat almost anything. While fish makes up the majority of their diet, they will stalk everything from insects to small mammals.
